

US History EOI: 4 -Identify how automobiles changed American life  
-Identify how the expansion of electricity changed American life

This activity is designed to: 1. Allow students to demonstrate their knowledge of how the automobile and electricity changed American life. There are three levels of difficulty:

Level I: Match same picture label to the same picture label on the worksheet.

Level II: Place the "Life Before and After Automobile" or "Life Before and After Electricity" symbol on the worksheet (with color cues).

Level III: Place the "Life Before and After Automobile" or "Life Before and After Electricity" symbol on the worksheet (with color cues).

Instructions:

Make sure Boardmaker is in Design mode (press CTRL + D or ESC to change to Design mode).

Print the worksheet needed for your student.

Allow student to cut apart labels and/or cut them out for the student.

Allow the student to tape, glue or otherwise place the label in the correct spot on the worksheet.

\*\*For students with physical disabilities, you can place the picture labels on a communication device, have an assistant point to a spot on the worksheet and ask the student to choose the correct answer from their communication device. The assistant then moves the student's choice to the diagram and secures it in place (velcro, tape, glue). You can also use the high tech version of this activity which is modified for switch access.

\*\*You can also print and laminate the worksheet(s) and label(s) and use velcro to create an activity that can be used over and over by multiple students. You will need approximately 4.5" hard/hook velcro and 4.5" soft velcro to assemble all three worksheets.

NAME: \_\_\_\_\_

## Life BEFORE Automobiles

Travel was slower

Less pollution

Fewer jobs

Had to live where you worked

Travel by horse

## Life AFTER Automobiles

live anywhere

More pollution

People could travel faster

Developed new jobs

"Invention" of Motels & drive-in
